

Something exciting is happening at ABC! We are getting some new buildings to learn in.

The new school buildings will take a long time to build, and things will look different around school.

The first thing you will notice is a big green fence.
The new building is being built behind it.

We will only be able to play in these areas, while the new building is in creation mode.

We can still play lots of fun games, ride bikes, and play on the swing inside the black fence.

Past the fence is the game over zone! It is like another player's creation mode. We will get to be in story mode there in a year.

There will be loud noises in the game over zone while it is in creation mode. If it is too loud, you can ask for head phones, or ask to take a break.

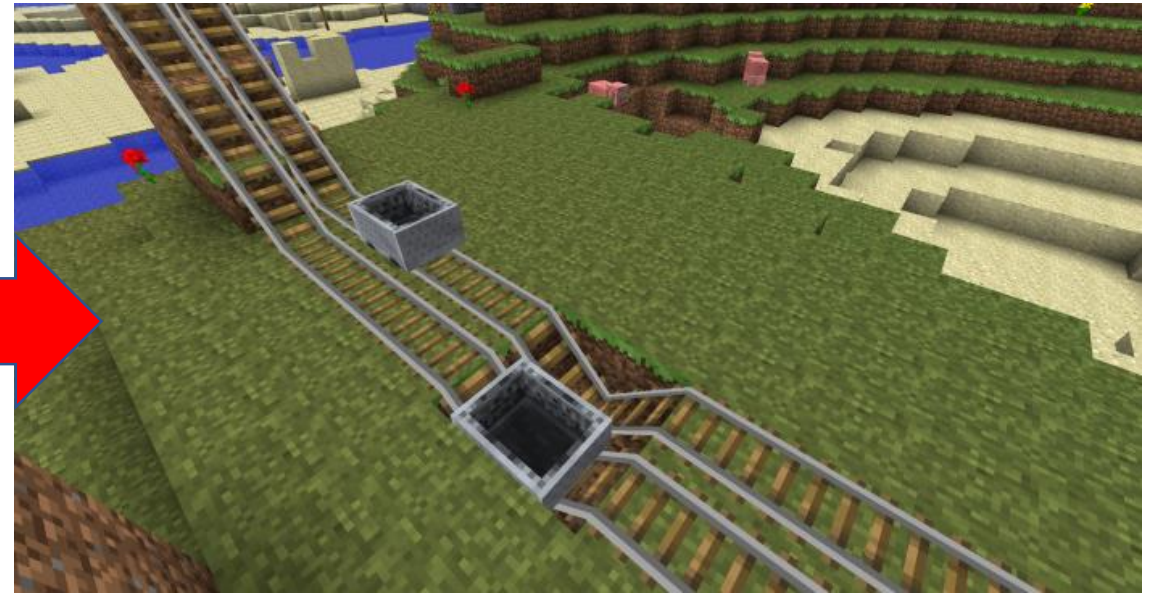

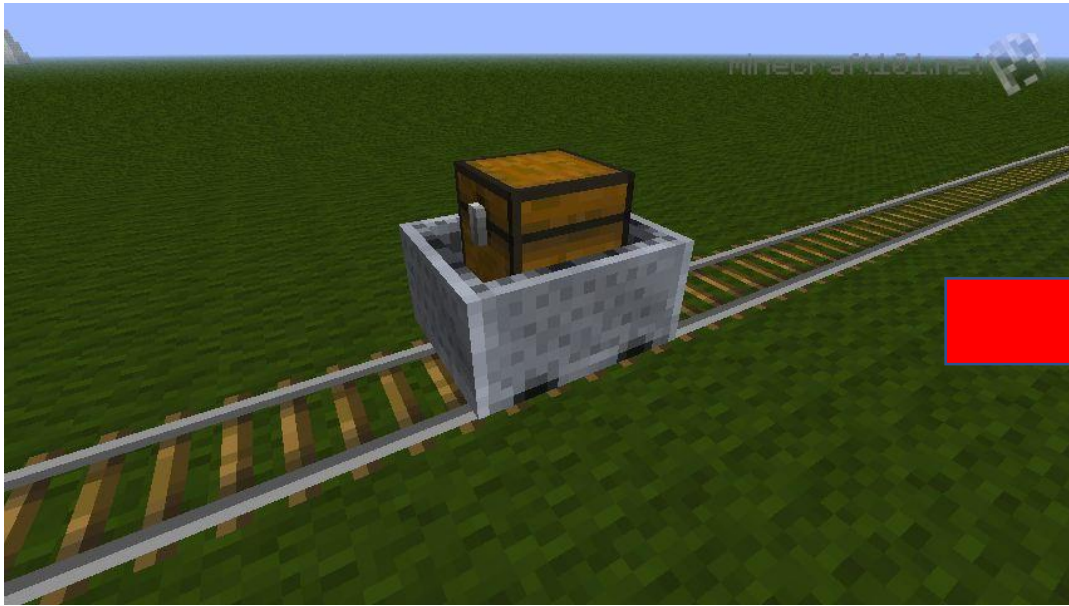

Watch out for a lot of construction equipment and cool things you will want to see! You can ask your teacher to tell you about them, but you cannot go into the game over zone.

You will see new people wearing strange things.
They are like Squid mobs. They may look scary,
but they are harmless.

The way you get dropped off will also change.
There will be two drop off lanes instead of one.

Creation mode for the new building will take at least a year! But once we enter story mode, it will be so much bigger, better, and more fun!
